

AuraLast® exterior door frame and components

Environmentally Friendly Aspects

AuraLast®, JELD-WEN's proprietary, water-based, vacuum-pressure process*, protects the environment as well as the product. The process produces 96% fewer volatile organic compounds (VOCs) than the solvent-based dip-treat process used by other manufacturers.

*Patent pending

REAL DURABILITY

You can count on JELD-WEN® windows, doors, exterior door frames and mouldings with AuraLast® wood to provide protection against:

- Wood decay
- Water saturation
- Termite infestation

WARRANTY

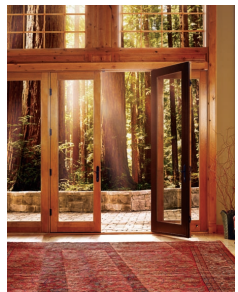

At JELD-WEN, we're confident of the durability AuraLast wood provides, which is why we offer a **limited lifetime warranty** on pine exterior door frames and components with AuraLast and a limited 20-year warranty on pine wood windows and doors with AuraLast – against wood decay and/or termite infestation. For complete warranty information visit www.jeld-wen.com/auralast.

AURALAST® WOOD

Windows, Doors, Exterior Door Frames and Components

NOW THE BEAUTY OF
WOOD LASTS LONGER

RELIABILITY *for real life*®

THE MANY STRENGTHS OF AURALAST® WOOD

RELIABILITY for real life®

Protects against wood decay

JELD-WEN pine windows, doors, exterior door frames and components with AuraLast wood are protected against wood decay, so they'll maintain their structural integrity even in the harshest weather and most severe climates.

Protects against termite infestation

Another benefit of AuraLast wood is that it protects against termite infestation. While harmful termites will eat through unprotected wood, JELD-WEN windows, doors, exterior door frames and components with AuraLast wood will keep them at bay.

Protects against water saturation

AuraLast wood offers superior resistance to water saturation and protects wood against swelling. This helps prevent the window or door from sticking. They will continue to open and close easily regardless of environmental conditions.

Clearly beautiful

In pine wood, AuraLast acts as a grain sealant allowing for a beautiful, even, stain finish. On the other hand, non-AuraLast requires a pre-sealant application to achieve the same appearance.

AuraLast wood was put to the test for several years in a very harsh and humid environment.

As you can see, after removing the window from its untreated framework, the AuraLast wood clearly withstood the harsh elements of wood decay and termite infestation. AuraLast wood is clearly the survivor!

JELD-WEN AuraLast Clear Coated

AuraLast does not alter the natural wood color

JELD-WEN AuraLast Stained

A beautiful stain finish with no pre-sealer needed

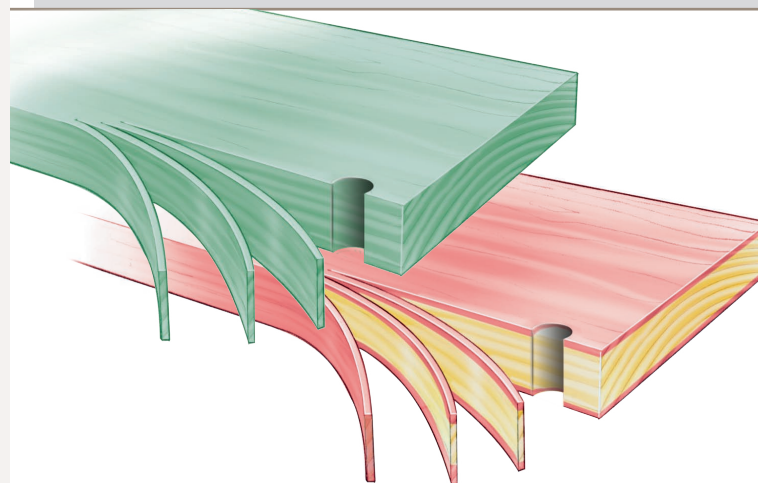

JELD-WEN AURALAST, THE WORRY-FREE WOOD®

JELD-WEN® pine wood windows, doors, exterior door frames and components are crafted from AuraLast wood which has environmentally friendly aspects.

AuraLast wood offers reliable protection from wood decay, water saturation and termite infestation. It also provides virtually 100% penetration of the protective ingredients to ensure that our wood windows, doors, exterior door frames and components remain beautiful and worry-free for many years to come.

See jeld-wen.com/auralast for additional AuraLast® information.

AuraLast wood (shown in green) provides virtually 100% penetration of the protective ingredients from the surface to the core. This means nail and screw holes or trimming and sanding cannot compromise the integrity of AuraLast wood.

Other manufacturers use dip-treated wood (shown in red) which has only surface protection. This means the treatment's effectiveness will be compromised when the surface is broken during installation.

NOTE: Colors are used for illustration purposes only; AuraLast wood is visually identical to pine.
