KNOTTY ALDER DOORS

Knotty Alder Doors from Simpson

The largest selection of Knotty Alder doors in the industry

Knotty alder has fast become one of the most common wood species used in American homes for cabinets, doors and other millwork products. Its combination of rustic charm and warm coloring make it a perfect match for today's casual living. Offshore manufacturers have capitalized on this trend by flooding the market with knotty alder products, including large quantities of doors. Unfortunately, the breadth of designs offered by these importers have been limited and builders and homeowners have been frustrated by the lack of design choices.

Looking for more design choices for your knotty alder doors? Look to Simpson. We're nestled in the forestlands of the Pacific Northwest and manufacture over 900 standard door designs. We've been hand-crafting America's finest doors for nearly 100 years and have earned our reputation for quality, innovative design and unmatched performance. So when you want knotty alder doors and are looking for something different, there's no better choice than Simpson.

The Simpson Advantage:

- We offer the most standard knotty alder door designs in the industry.
- Now you don't have to settle for choosing from just a handful of knotty alder design options – with Simpson, the knotty alder options are limitless.
- If you can't find a door you like from our standard product line, don't worry. Simpson has a facility dedicated solely to the manufacturing of one-of-a-kind doors.
- Quality, as always: engineered stile and rail construction assures your doors are as dependable as they are beautiful.

Any Door, in Any Species.

Remember, you can choose from an array of species, from traditional to exotic, each meeting our strict grading standards.

“OUR DOOR”

[STEP-BY-STEP]

“We’ve never been the type of people who feel like we have to ‘keep up’ with our neighbors. However, as we live on a really nice block and the families here are always improving the look of their homes, it seemed to make sense to keep enhancing the value and curb appeal of our home. We knew that having gorgeous doors would have a lot of impact on the overall look of the house, so we started to investigate our options.”

— The Casey Family, Fairfield, CT

And here's how we arrived at our decision:

STEP 1

“One of our neighbors suggested working with Simpson doors because of their variety of beautiful designs and wood species choices.”

STEP 2

“As we looked over the range of what Simpson had to offer, we instantly fell in love with knotty alder. It had the perfect marriage of head-turning beauty and casual charm.”

STEP 3

“We ordered eight foot tall double doors with sidelights to create a truly grand entrance.”

STEP 4

“We topped it all off with the right hardware and now have all the other neighbors asking us about our doors!”
